

The Authenticity of the Book of Genesis

William Cooper

Using the three-part format of Dr. Cooper's 424-page tome, this project will be done as three books: *Antiquity of the Book of Genesis*, *Flood Traditions Around the World*, and *The Genesis Flood Tablet*.

Attacks on the Bible and Christianity have concentrated for decades, if not centuries, on Genesis chapters 1-11. There are two primary areas of response. Creation science, which addresses the scientific questions about Creation, is a well-known and mature area of Christian apologetics.

The other area of response is severely under-served, especially in cross-cultural ministries. But vital support for Biblical authenticity comes through studies of history, anthropology and archaeology.

Cooper's book fills the gap admirably and is useful for Christian leaders, whether in Bible institutes or local churches. These three books in parallel English and Chinese will make it available in China and globally. For this project, however, the immediate need is for use in China. China is now the most populous "Christian" country in the world. And the Chinese church has matured to the point where an academic apologetic resource like Cooper's will receive widespread use.
